BOOK SYNOPSIS

A remarkable, fascinating and beautiful visual guide to the world as you have never seen it. Vargic's Miscellany of Curious Maps is a wonderfully weird collection of meticulous and striking cartographic creations, such as the infamous Map of Stereotypes. Based on a Westerner's stereotypical view of the world, Slovakian artist and cartophile Martin Vargic assigns more than two thousand labels and prejudices to cities, states, countries, continents, oceans and seas on a large-scale, visually stunning world map, which alone took more than four months to create. The conceptual Map of the Internet and the Map of Sports are exquisite and surprising, and infographic maps showing the number of heavy-metal bands per capita, the probability of getting struck by lightning, average penis length, and the number of tractors per 1,000 inhabitants make it hard not to share with the person next to you. Including more than 70 maps, four foldout maps and two oversized removable posters, this book is a treasure trove of unexpected facts of our quirky, glorious and diverse big beautiful world.
